Quebrada de Santa Elena in Santa Rosa de Cabal.

The Coffee Cultural Landscape is a real surprise. There are so many choices there for culture, nature, architecture, parks, and the crafts and all the other things that people do in their lives in this beautiful region.

Traditional Mansions and farmhouses, theme parks, golf courses, extreme sports and (of course) coffee everywhere, at all stages of production. And these are just a few of the attractions of this corner of Paradise.

The highway network is excellent to travel around for any purpose: to do business, to contemplate nature, to use nature for adventure, or whatever.

The Coffee Cultural Landscape is an original choice, a choice with a difference – if you like a harvest of tourist products and plans which make the tourist part of the family.

Here are some good places to visit:
